Speakers

- **Nicola Bedlington**, Secretary General, European Patients' Forum
- **Dr Wendy Yared**, Director, Association of European Cancer Leagues
- **Carole Absil**, Business Group Leader Markets, Agoria
- **Joost Felix**, COCIR Lead member in Digital Health and Manager, Global Head of Integrated Care Solutions at Agfa HealthCare

Questions for Discussion (1/1)

1. What do you think about having an open, secure digital infrastructure to support cloud-based data aggregation and analysis of clinical data and real-time collaboration?
2. Ensuring security/confidentiality is one of the main drivers behind health data location requirements. We need to find the mechanisms to safeguard people's privacy while maximizing opportunities for innovation, growth and job creation. Will data regulators commit to an Innovation Principle?
3. Will Member States commit to more cooperation and can the EU do more to support Members states and regions in their efforts to provide citizens' access to their health data?
4. How can we meaningfully engage patients?
